Save 10%... to Save 100%

All over the nation, patriotic Americans are spending less and saving more—putting at least 10% of their incomes into War Bonds and Stamps. So our boys can have the planes and tanks and guns they need to fight and attack and WIN for us!

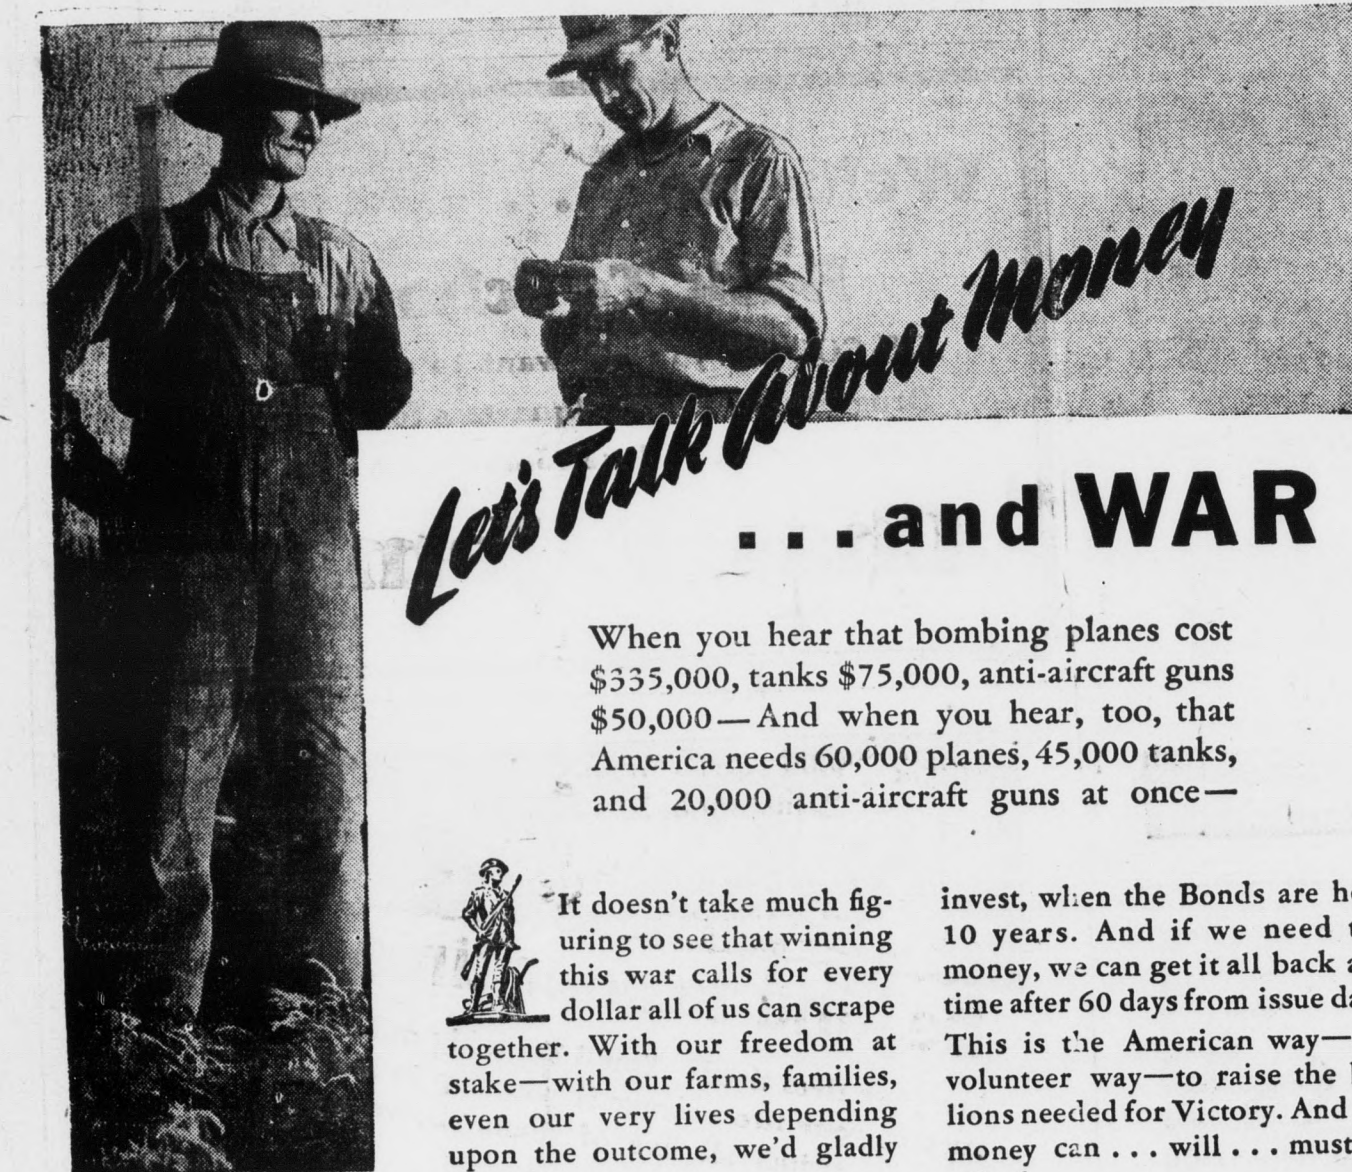

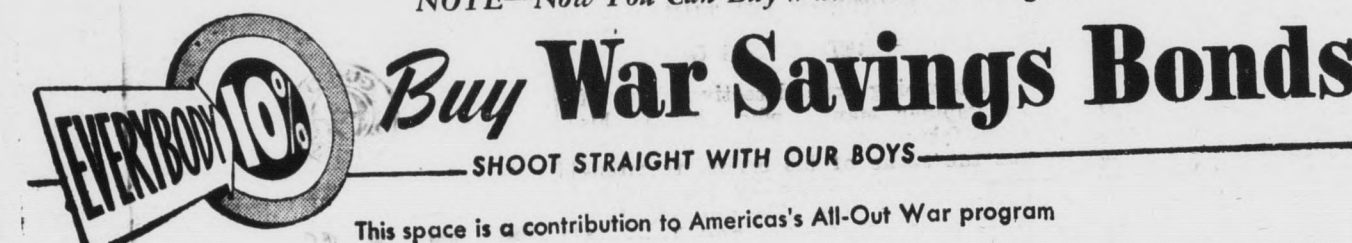

So the Nazis and Japs will wish they hadn't

tried to enslave America, too—and won't ever try it again!

And it's going to take 10% in War Bonds to do it!

So, if you've been postponing buckling down, remember, it's "Everybody 10%," or "Nobody (except our Axis masters) having a cent."

NOTE—Now You Can Buy War Bonds Through Your Rural Postman!

"It doesn't take much figuring to see that winning this war calls for every dollar all of us can scrape together. With our freedom at stake—with our farms, families, even our very lives depending upon the outcome, we'd gladly give this money.

But we aren't asked to do that. Our Government asks us only to lend the money—to put our increased earnings into War Bonds—month after month—until this war is won. In doing so, we save for our own security as well. We get back \$4 for every \$3 we

invest, when the Bonds are held 10 years. And if we need the money, we can get it all back any time after 60 days from issue date. This is the American way—the volunteer way—to raise the billions needed for Victory. And the money can... will... must be raised. So let's show them that the farmers of America are helping to win this war in two vitally important ways—by producing more Food for Freedom and by saving more in War Bonds. Make Every Market Day "Bond Day"—Invest At Least 10%.

Prepare Now for V-I-C-T-O-R-Y AFTER VICTORY

The problem of changing from war work, after World War I, to peacetime production, plunged us into a long and grim depression. Rural America felt this depression five years ahead of industry and business. We tried to warn labor and capital but they would not believe the warning and insisted the rainbow and the pot of gold at the end would last forever.

Finally, the bubble broke and the storm came. We had 12 million unemployed, the domestic market for farm production was gone, and even the smaller export market disappeared. Farm income was reduced, mortgages increased and many farmers lost their farms while industry, big and little, was at its wits' end to survive.

To Prevent a Worse Depression. Our problem is to prevent even a worse depression. Every industry, big and little, has been retooled to produce airplanes, tanks, automobiles and weapons of war. Millions and millions of dollars have been spent for this purpose.

When this war is ended it will take the same millions of dollars to turn these industries back to peacetime production.

Lessons of World War I. We learned after World War I that agriculture prospered unless our country cannot prosper unless agriculture prospers. We know now that our country cannot prosper unless agriculture, business and industry, and labor are all prosperous. Whatever our personal feeling may be, the fact remains that all of these groups taken together make up our domestic market which consumes over 90 per cent of our total production.

Farm Prices Reflect Good Business. This makes it plain that with employers and business buy in useful undertakings, with all workers employed at good wages, farm prices will be good and consumption at its maximum.

The key to the situation is that employers shall have the cash money at hand to change from war manufacture to peacetime activity with the least possible delay when this war ends.

Our United States Senate is searching for a plan that will produce maximum revenue to the government to insure victory; provide a fund at the end of the war big enough and quickly available to meet business and industry from war work to peacetime necessity, but without the government having to borrow and lend the money for this purpose after the war is over.

Here is a Simple, Practical Plan. For the solution of all these problems there is one simple plan of outstanding practical value, based on the idea that war profits from all companies, big and little, should be used for this purpose.

The tax rate on war profits is figured at about 90 per cent. Business and industry, big and little, would be permitted, however, to deduct from their taxable war profits 20 per cent of such profits, provided the deduction is used to purchase United States Recovery Bonds.

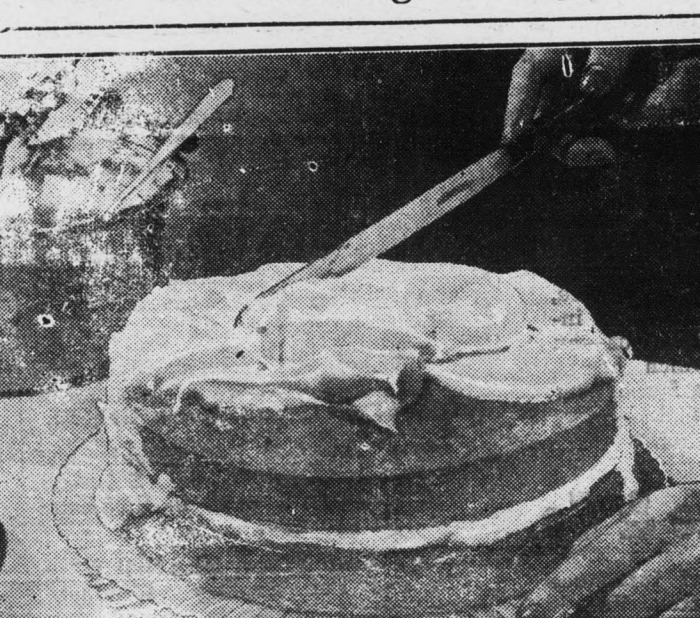

Recovery bonds would be a special kind of bond for this purpose only. Recovery bonds could not be sold or borrowed upon during the war, and neither would they pay any interest. They must be held by the purchaser until the end of the war. The day the war is over these bonds would automatically start to bear interest, could be bought and sold, and become the same as any other government bond. The purchaser could sell them or borrow upon them to obtain the money to change his business and plant from war production to peacetime production when and as he needed money to do this job.

Profits for Peace-Time Recovery. In other words, business, big or little, would be required to contribute 20 per cent of its own war profits to provide the money to change its own plants back to peacetime production.

The fairness and equity of such a plan is perfectly plain. Each company, by using 20 per cent of its own war profits to buy Recovery bonds, builds its own backlog to bridge from war production to normal peacetime activities. Big companies and small companies will buy in proportion to their size and needs until the war is over. In the meantime, our government receives the maximum revenue to produce for Victory, and we, the people, have established security against the worst depression of all time.

Even the Frosting is Sugarless!

In quest of a cake that doesn't use sugar? Then look at this lovely layer developed in the Rumford Kitchens. No sugar is needed for the cake or frosting, and since sugar tends to mask ingredients, Rumford, being an all-phenol-cholate baking powder, leaves no after taste in sugarless recipes. Here's how to bake the cake and its variations, and the frosting that tops them all:

Sugarless Cake
 2 cups sifted 1 1/2 cups syrup
 4 teaspoons Rumford 2 egg yolks
 1/2 cup baking 1/2 cup shortening
 1/2 teaspoon salt 1 egg white
 1/2 cup shortening 1 egg white
 Sift together flour, Rumford Baking Powder, and salt. Cream shortening, add 1 cup of the corn syrup gradually, and cream until fluffy. Add egg yolks one at a time, and beat well. Add sifted dry ingredients alternately with milk, stirring well after each addition. Add beaten orange rind. Beat egg whites until stiff, add remaining 1/2 cup corn syrup gradually, beating until mixture stands in stiff peaks. Fold in butter until well blended. Bake in 2 greased 9-inch layer cake pans 35 to 40 minutes. Cool and frost as desired. Yield: 2 layers.

Yellow Cake: Use 6 egg yolks and no whites. Beat with a rotary egg beater until thick and lemon colored; add the corn syrup gradually, beating constantly.

White Cake: Use 6 egg whites and no egg yolks. Beat the egg whites until stiff, then gradually beat in the 1/2 cup corn syrup.

Chocolate Chip Cake: Add 1/2 cup semi-sweet chocolate, broken into small pieces, to the cake batter just before folding in the beaten egg whites.

Sugarless Frosting
 1/4 cups corn 1 teaspoon Rumford Baking Powder
 1/2 cups syrup 1/2 cup shortening
 1/2 cup shortening 1/2 cup shortening
 2 teaspoons favoring (vanilla or other desired)

Boil corn syrup in a saucepan over direct heat until it spins a thread when dropped from a spoon. Beat egg whites foamy; add Rumford Baking Powder and beat until stiff. Add corn syrup slowly, beating vigorously while adding. Add favoring and continue beating until frosting is stiff and stands in peaks. Yield: Frosting for 2 9-inch layers; 1 medium loaf cake; or 16 large 1/2 cup cakes.

THIS IS A TYPICAL POLISH AIRMAN fighting with the Royal Air Force. The British Air Ministry announced that the famous Warsaw unit, the Polish Air Force, played a valiant part in the air raid on that French port. The announcement said that the Poles destroyed "one German plane. This same squadron, during the battle of Britain, shot down 126 German aircraft."

Bomb 'em with JUNK

Let's blast Japan—and Germany—and Italy—with the chain lightning of destruction that can be built from the scrap in our cellars, attics and garages, on our farms and in our places of business.

Scrap iron and steel, other metals, rubber and waste materials. It will all be used to make tanks, ships, planes and the fighting weapons our boys must have. It is needed at once.

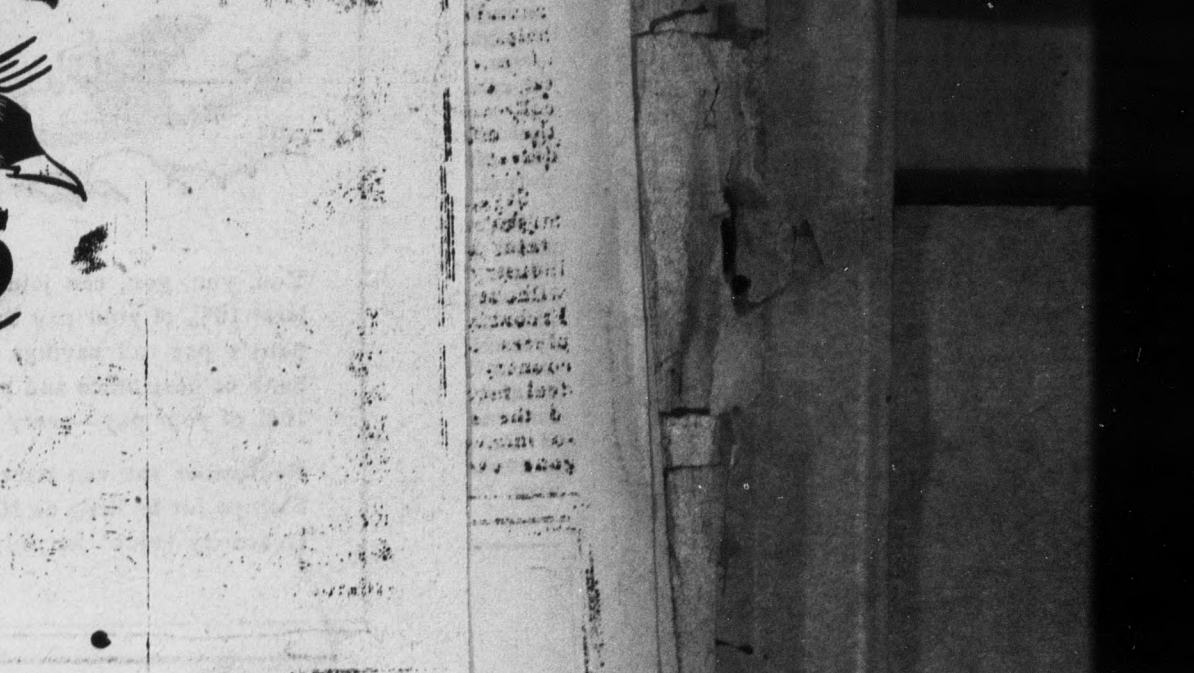

Sell it to a Junk dealer—give it to a charity or collection agency—take it, yourself, to the nearest collection point—or consult the Local Salvage Committee... If you live on a farm, and have found no means of disposing of your Junk, get in touch with the County War Board or your farm implement dealer.

Throw YOUR scrap into the fight!
